

2" Wide Junior Polycarbonate™ Snow Guard

For Metal Roof Systems

Mechanically Fastened Staggered Installation Option Shown

Overview

The Junior Polycarbonate™ offers a 12.5 square inch bonding surface and 2" base to fit specific panel systems with intermediate ribs and corrugated metal panels. Manufactured from clear UV-stabilized polycarbonate material, or in a color that is injected throughout the product and matched to any standard roof panel. **Apply using 3M VHB Tape, tube adhesive, or a mechanical fastening application.**

Innovation

Manufactured from UV-stabilized polycarbonate, the unique design of these crystal-like guards suspends the field of snow until the snow and ice gradually melt under the sun's rays.

CUT: Sno Gem® snow guard's prismatic design was developed by architectural sheet metal professionals with over 100 combined years of on-the-roof experience.

CLARITY: Sno Gem® offers a clear prismatic snow guard which retains its crisp, clean and architectural appeal. There's no metal to rust or stain. Sno Gem® snow guards are unaffected by climate extremes.

COLOR: Sno Gem® snow guards can be matched to all industry standard metal roof colors. Sno Gem® also offers an unlimited amount of custom colors to closely match the metal roof panel. The color is injected throughout the product.

Dimensions

Height: 3.25" - Width: 2" - Length: 6.25"

Applications

For Metal Roof Systems.

Colors
