

## Barricade Plate

For Sno Barricade Clamp-On & Deck Mount Bar Systems

Sno Barricade Clamp-on Standard Model with Barricade Plates

Flat Base Deck Mount Bar System with Barricade Plates

### Overview

The Barricade Plate is an optional item that is available in color to match or mill finished material. Once properly installed, the Barricade Plate holds the smaller amounts of ice and snow that could pass beneath the bar. The Barricade Plate is installed on the upslope side of the bar. A tek screw (not visible from the ground) holds the Barricade Plate in place.

### Dimensions

Standard width of Barricade Plate is 3", while custom widths are available. Height of vertical plate varies, depending on height of the seam.

### Colors

Standard or Custom Panel Manufacturers' Colors Available in Powder Coating or Kynar.
