

Original Metal

For Copper, Slate, Asphalt Shingle, and Metal Roof Systems.

The Original Metal Sno-Gem snow guard offer proven snow protection. They can be manufactured in a wide assortment of metals to best complement the roofing system, and are available unfinished, or in the same color as the roof. Installation methods vary by roofing system and by installer preference.

Modeled after the Sno-Gem Original and manufactured in any metal form, including Follansbee steel, copper, prefinished Kynar 500 metal, stainless steel, brass, galvalume, aluminum, and TCS for metal, slate, and shingle roofs. Optional pre-tinned backing for soldering to copper just clean and heat on the roof system. Plate attachment available for installation on slate or shingle roofs.

The Original Metal and Half-Carat SNO-GEM snow guards can be manufactured in these metals:

Copper, Stainless Steel, Follansbee Terne Metals, Prefinished Kynar Steel/Aluminum (Any Color), Lead-Coated, Copper, Galvalume, Zinc

Custom-Fit Plates: Use the Original Metal and Half-Carat Sno-Gems for your SLATE and ASPHALT SHINGLE roof systems. The Sno-Gems will be attached with a custom length plate to meet the needs of the specific slate or shingles used for proper installation.
